

2011 ECMI Statistical Package

The most comprehensive overview of Europe's capital markets

The 2011 Statistical Package offers users the most up to date information on the state of European capital markets in the aftermath of the financial crisis. Contents are divided into six sections: equity markets, debt securities markets, exchange-traded derivatives markets, over-the-counter derivatives markets, asset management and global comparative data. Internal links, as well as a complete table of contents, facilitate the internal navigation of the document; and the most important datasets are represented in charts in order to demonstrate trends visually.

The 2011 version includes disaggregated data on equity markets for each stock exchange belonging to the same group. The package also compiles, for the first time, a wide range of MiFID statistics for pan-European and national trading venues. Moreover, the debt securities section has been upgraded with data about securitization and the section on exchange-traded derivatives now includes a complete stock and index options and futures overview. The asset management section has been then enriched with data about pension funds and insurance companies. Finally, a brand new section on global comparative data presents a qualitative analysis by our senior staff of main global capital market trends.

The ECMI Statistical Package presents a comprehensive collection of relevant data on the dynamics of various segments of European capital markets, complete with graphical representations and explanatory commentary. It enables users to trace trends so as to highlight the ongoing transformations of capital markets, including the structural changes brought about by competitive forces, innovation, and regulation. It represents an important step to overcome the existing fragmentation in data on the evolution of European capital markets by offering a 'one-stop-shop' for market participants, regulators, academics and students.

The package is available PDF and Excel format at www.eurocapitalmarkets.org free of charge for ECMI members. Non-members may purchase it via the bookshop of CEPS at www.ceps.eu.

ECMI Statistical Package 2011	
Covers:	Data on:
<ul style="list-style-type: none">- Disaggregated data for more than 42 stock exchanges- 133 tables- 102 figures- Up to 19 years- Tables and figures on global comparative data with qualitative analyses of main global capital market trends	<ul style="list-style-type: none">- Equity market- MiFID statistics- Debt securities market- Exchange-traded derivative market- Over-the-counter derivative market- Asset management- Gross domestic product- Exchange rate

About ECMI – European Capital Markets Institute

Informing Policy on European Capital Markets

The European Capital Markets Institute (ECMI) is an independent think tank that undertakes and disseminates research on capital markets and contributes to ongoing policy debates in Europe. ECMI acts as a focal point for academics, market participants and policymakers to exchange ideas on the efficiency, stability, integrity and competitiveness of our capital markets. These exchanges are fuelled by the various outputs ECMI produces, such as regular commentary, policy briefs, research reports, statistics, seminars and conferences. ECMI is managed by the Centre for European Policy Studies in Brussels, among the top three European think tanks.
